

SOG
Specialty Knives & Tools

PRODUCT CATALOG 2011

A WORD FROM “THE GUNNY”

It is said that the dawn of human intelligence and civilization can be traced to the emergence of tools - flint knives and spear heads - during pre-historic times.

And ever since, there has been a unique bond and relationship between humanity and the knives and tools we use. These instruments mean much more to us than the functions they provide. They symbolize independence, ingenuity, self-sufficiency, strength and confidence. With them, we feel prepared for any situation and in control of our environment and destiny.

I often think back to when my grandfather gave me my first knife, a pocket-knife. It meant more to me than just a nifty, sharp-edged tool. It meant that he felt I was ready for responsibility, that it was time to begin to leave childhood behind. It was time to become accountable, productive. That's a rite of passage that I am sure most of you can relate to and an experience we need to keep alive for young people today.

Knives and tools can be an important vehicle for helping teach children about responsibility, accountability, confidence and character. We need to help foster a relationship for them with knives and tools - as we had done for us - so that they, too, can come to understand that it is within their power to conquer any situation and provide for themselves.

Within these pages you will find some of the best designed, engineered and built knives and tools in the world. They really are outstanding! But this catalog, really this company, is not about that. It's about you and the relationship you have with these products. That's where we started when we began to conceptualize our 2011 line - with an understanding and respect for the relationship you have with knives and tools. Because we know SOG Specialty Knives and Tools are not just about what you can do with them, but what they mean to you.

We hope you enjoy our products and will use them well.

R. Lee Ermey

R. Lee Ermey - “The Gunny”

“Extraordinary Knives and Tools...”

Since 1986, we've been creating the strongest most innovative multi-tools and knives on the market. We don't settle for the ordinary, we never have and we never will.

The human eye can distinguish the essential from the non-essential, the aimful from the arbitrary. The beauty of a SOG designed product is in its purpose.

Some manufacturers simply produce knives and tools. At SOG we create style and substance through craftsmanship. Our purpose is to combine advanced technology, imaginative designs, and quality construction to create products of the highest caliber - products that enhance your life. This is the philosophy that you share with us, each time you choose a SOG product.

PROFESSIONAL PRODUCTS FOR:

SOG started some 25 years ago in my apartment with a simple philosophy – to create innovative products that stood apart from the pack. While the company has grown, our commitment to that philosophy has remained constant. Today it's one of my greatest satisfactions to receive letters from throughout the world describing how SOG products have lived up to that standard. It is what inspires us to continue to build great products that last and that help you meet the challenges of a demanding world.

Spencer Frazer
SOG Founder & Chief Designer

COMPOUND LEVERAGE

Compound Leverage has become a SOG patented trademark for folding tools. With the same hand pressure you will generate twice the wire cutting and gripping power than all other conventional designs. Don't believe us? Use the wire cutter on one of our Compound Leverage multi-tools to cut some hard wire and feel the smooth power- Then do the same with someone else's multi-tool..... and try not to bust your hand!

SAT (SOG ASSISTED TECHNOLOGY)

SOG Assisted Technology works through the balance of opposing high-tension coil springs. As one opens the blade the force to propel the knife open becomes greater than the closing force and the blade will open on its own. The end result propels the blade out once the operator has initiated the one-handed opening action. SAT works so well that right-handers can use their left hand equally well to open a folding knife (of course this works oppositely for lefties).

THE SOG ARC-LOCK

The patented Arc-Lock just might be the perfect lock. Why? It is totally ambidextrous and has all of the attributes knife designers relentlessly search for, but rarely find. Strength: The Arc-Lock far surpasses conventional lock strength, tested at over 1000 pounds of force measured at the lock in an independent lab test. Speed: The Arc-Lock provides lightning-quick, one-handed opening and closing capability. Safety: Spring-action securely retains the blade closed. When unlocking, the fingers are safely kept clear. Durability: The Arc-Lock is self-adjusting over time and can be easily cleaned for long term optimal performance.

CRYOGENIC HEAT TREATMENT

SOG's unique cryogenic heat treatment process increases the toughness and wear resistance of our blades. Taking the knife slowly down in temperature to less than -300°F and then back to room temperature. This stress relieves the material on an atomic level and increases overall strength as well as edge retention. Knife edges stay sharp longer with significantly less micro-fracturing and edge-chipping. Its this dedication to making your knife SOG sharp that sets us apart from the rest. Look for the new Cryogenic Heat Treated logo on selected SOG Knives that have received this process.

GRN

We have replaced the Zytel used in many of our folding knife handles with our new GRN (glass reinforced nylon) material. This material is highly wear resistant, easily moldable and lightweight. GRN has excellent impact chemical and heat resistance and is perfect for creating knife handles.

TACTICAL NYLON SHEATH

Try on these new military carry sheaths that are standard issue with many of our products. Input from our tactical advisors indicated that military departments are changing their uniforms and requirements for attaching hardware. We took this information and designed something new in knife carry, the Tactical Nylon sheath. Our secondary pouch on the front allows you to complete your gear with a SOG multi-tool or folder. The modular mounting system on the back is the most versatile possible; military belts, MOLLE type applications, belts, vests, etc. are all easily mounted to quickly and securely.

15 TOOLS
COMBINED

Closed: 7.125"
 Open: 4.675"
 Weight: 9.3 oz.
 Steel: 420 Stainless
 Finish: Polished or
 Black Oxide
 Option: MOLLE or
 Leather Pouch

Components: pliers/gripper, hard wire cutter, crimper, straight edge blade, fully serrated blade, 3-sided file, large screwdriver, Phillips screwdriver, can opener/small screwdriver, bottle opener/medium screwdriver, scissors, rulers, and lanyard ring. EOD version available with fuse well spike in place of Phillips screwdriver, file and bottle opener/medium screwdriver.

PowerAssist

SOG makes the only multi-tools in the world with one-handed flip opening and gear driven patented Compound Leverage for double the plier power... the PowerAssist takes these principles to a new level. This is the first multi-tool in the world that houses not just one but two assisted opening blades. Start to open the main blades, which are available when the tool is closed, and SAT (SOG Assisted Technology) takes over to complete the opening. When not in use, blades lock closed using our patent pending side release. It's never been easier! Flip open the tool and experience the precision of the heavy-duty plier capability and large wire cutters. Smooth handle surfaces promote comfort on even the toughest jobs. Also includes the gear covers, V-Cutter, and built-in crimpers. When it comes to tough... Look to SOG!

Models

S66-N	Standard (Shown)
B66-N	Black Oxide
S67-N	EOD Standard
B67-N	EOD Black Oxide

The patented V-Cutter in SOG tools opens up possibilities. Whether cutting seat belt, paracord, fishing line, zipping electrical cable sheathing, opening packages or stripping wire, the V-Cutter performs at a higher level, guaranteed!

**22 TOOLS
COMBINED**

Closed: 4.6"
 Open: 7"
 Weight: 9.6 oz.
 Steel: 420 Stainless
 Finish: Polished or Black Oxide
 Option: MOLLE or Leather Pouch

Components: pliers/gripper, hard wire cutter, crimper, double toothed wood saw, 1/2 serrated blade, 3-sided file, large screwdriver, Phillips screwdriver, 1/4" drive, awl, can opener/small screwdriver, bottle opener/medium screwdriver, scissors, rulers, and lanyard ring. New EOD version available with fuse well spike.

PowerLock

As one of the original multi-tool manufacturers, we have learned quite a bit over the years. Like how to make the toughest tools with patented gear driven compound leverage mechanisms. You have let us know that quick access is a must. Just flip our tools out with one hand and see for yourself how well we listened. There is also a myriad of features that you might not readily see, like our saws cut faster and our files shave better. Does all this make sense? You bet, which is why leading military forces choose SOG!

Part #: CC51-CP
 Closed: 2.5"
 Open: 4"
 Weight: 1.7 oz.
 Components: 1.3" scissors, straight blade, nail file, medium screwdriver, small screwdriver, bottle opener, tweezers, toothpick and ruler.

**10 TOOLS
 COMBINED**

CrossCut

The CrossCut is a precision instrument for cutting, personal care and the unexpected. SOG's gear driven compound leverage allows for big-sized cutting power to be truly miniaturized with its spring-loaded scissors

**15 TOOLS
 COMBINED**

Closed: 4.3"
 Open: 6.4"
 Weight: 6.2 oz.
 Comes With: Nylon Pouch

Components: pliers/gripper, wire cutter, serrated blade, straight blade, 3-sided file, large screwdriver, Phillips screwdriver, awl, can opener/sm. screwdriver, bottle opener /med screwdriver, rulers, and lanyard ring (optional saw or serrated line cutter).

Paratool

The Paratool is the only multi-tool with a multiple-angled plier head capability. The unique, patented way the Paratool opens allows for the ability to operate at a variety of angles (140°-180°), indispensable in tight spots. The comfort grip handles are smooth on the outside and feature SOG's classic ventilation holes for maximum gripping. Be prepared with the Paratool.

Weight: 5.5 oz.
Comes With: Nylon Pouch
Option: Leather Pouch

Pocket PowerPlier

Our quick deployment P3 is lighter, sleeker, and just as durable as our larger tools. Who says that great things don't come in smaller packages? We managed to downsize the same power and durability while maintaining the key features of compound leverage, one hand flip opening, and hex bolt construction. It's a smart choice for those on the go.

Models

Pocket Clip

Aegis

Aegis (ee-jis), which in Greek means shield or protection, is also the code name for the world's premier integrated air defense system. No wonder we borrowed the name to represent this state of the art line that is filled with technology and features. Start to open the knife, and let Aegis finish the action with a bang, using one of the surest assisted technologies (SAT) out there! Our trademark bayonet reversible clip, built in safety with red/ready to go, checkered DigiGrip handles, and tacky rubber inserts all contribute to make Aegis a platform for today's changing world. Cover your back with Aegis outdoor or tactical blades.

Trident

'Might meets right' could pretty accurately describe the Trident family of knives. They embody the spirit of elite special forces throughout the world. With so many unique features, these knives function as a personal arsenal to help conquer chores from the extreme to the every day.

The Trident series uses our well-proven means of delivering a knife blade to the open position with SAT (SOG Assisted Technology). Using our patent pending Arc-Actuator, the Trident locks stronger and releases easier than ever before. There is also a built-in safety to lock the blade closed, when it shows red, you are ready to go! What also makes the Trident so unique is the Groove in the handle, which allows the operator to cut paracord, fishing line, etcetera without having to open the blade. The handle also features our trademark variable Digi-Grip pattern for coarser grip in areas that require it. Finally, the bayonet style clip is easily switched for right/left hand carry or removed for pouch storage.

Twitch I , II

Looking at the intricate construction of the Twitches reminds us of the workings in a fine chronograph watch... everything tuned right and precisely in its place. These techno wizards feature a pass-through lockbar (patent pending) from which the "kick" of the blade sticks through. By pressing on the "kick", one is able to initiate the opening of the blade. SOG Assisted Technology (SAT) then takes over to finish opening and to securely lock the blade open. What makes these space-age little gems even more beautiful is that they are also affordable!

Twitch XL

The XL is classy... it moves well, looks right, walks the walk, and talks the talk. It is not just a larger version of a Twitch. It is serious business that can more than get the job done. This is a high-tech statement of sophistication with all the bells and whistles that you expect from the designers at SOG. The fine construction comes together to make the XL one of the most practical and beautiful knives that we have ever handled.

Flash II

The Flash has got to be one of the coolest knives we've ever seen. Forget its wicked-quick blade access, that it handles like a race car on rails, or that it locks up like Alcatraz. It just looks and feels extraordinary. The Flash family of knives feature SOG Assisted Technology (SAT), which employs a powerful piston lock that is easily released with the new Arc-Actuator on the Flash II. We also had the foresight to incorporate an additional safety lock that gives added security when the blade is closed. Note that when the safety shows red...

YOU ARE READY TO GO!

Spec Elite Auto 

Just good enough and too fast are not words in our vocabulary. Continuing to produce top line products for professionals is what we are fluent in. The new Spec Elite series is a tough contender when the sheet hits the fan. Manufactured from 6061-T6 hard-anodized aluminum these knives employ our state-of-the-art auto mechanism to ensure they open with conviction. New technology springs insure tens of thousands of reliable openings. Built-in safeties, reversible low carry clips and stout construction make them ideal for LE and Military.

Vulcan

In the world of firepower, the General Electric M61A1 Vulcan is top dog with its 6-barrel 20mm cannon of the Gatling-type. It fires standard M50 ammunition at 6,000 rounds per minute and is an integral part of the armament of modern fighters such as the F-15, F-16 and F-18.

Our Vulcan series is just as formidable, thanks to the muscular construction. Take our patented Arc-Lock, tested to over 1000 pounds of force at the lock. Or the full steel liners encased in GRN handles. The thick VG-10 blade includes our new kick deployment system. Press on the back of the blade and the knife comes out fast. Real fast! Reversible clip, Arc-Lock, and double thumb studs make the Vulcan great for full ambidextrous use. The Vulcan... It's no wimp.

See Vulcan Fixed blade on page 32.

Access Card

The Access Card 2.0 doesn't grant admission into top-secret facilities, but it does give a sense of security. This minimalistic sliver of a knife (3/16" thick without the clip) won't take up much room in your wallet, pocket, attached to a ballistic vest, or around your neck. The 2.75" formidable VG-10 blade opens and closes with one hand like a magic trick and locks up with our famous Arc-Lock. Although every bit of excess weight has been engineered out of the Access Card, you will be surprised at the power that it conveys.

Pentagon Elite & Spec Elite

Since its debut, the Elite series has achieved great popularity among the military and law enforcement community, as well as the general marketplace. The Elite knives are impeccably balanced and feature ergonomic glass-reinforced nylon handles, ambidextrous slotted thumb studs, machine screw construction, a low-reflective bead-blasted blade and clip, SOG's Arc-Lock system, and a reversible military-style clip that enhances gripping.

Mini X-Ray Vision

The SOG Mini X-Ray features the same award-winning, VG-10 steel blade as the original X-Ray Vision, but is almost an inch shorter. The end result... a great blade in a small package! People with big and small hands will find the Mini X-Ray a pleasure to hold and carry. It has a finely textured GRN handle that is both lightweight and ergonomic. Its ideal three-inch blade with partially serrated edge opens quickly and smoothly via SOG's Arc-Lock. The Arc-Lock offers superior strength, speed, and ambidexterity.

Visionary I & II

Visionaries are leaders because they dare to see beyond the present. We think that this new expansion on the Vision series will captivate you with its sense of style and performance. 'Practical tactical' is a phrase that we coined to designate tactical knives that you can use everyday. Although many of the SOG line of products fit this bill, the Visionaries seem to be the perfect embodiment.

Visionary knives keep a quiet profile with their non-reflective black powder coat finish and SOG's trademark low carry pocket clip. Ambidextrous Arc Lock and clip, woven texture GRN handle, and VG-10 blade make a compelling package. Handle the Visionaries and tell us what you see.

Part #: XV71
 Open: 8.37"
 Blade: 3.75" x .125"
 Weight: 4.3 oz.
 Steel: VG-10 Stainless
 Rc. 59-60
 Finish: Bead Blasted
 Edge: Partially Serrated
 Handle: GRN w/ Stainless Liners
 Comes With: Reversible Bayonet
 Pocket Clip

X-Ray Vision

“Tactical and practical” is the theme behind the X-Ray Vision. This combo-edged folder features the same blade design as the SOG Vision, VG-10 custom steel and performance capabilities, but retails at half the price! The X-Ray Vision was created for optimal performance and value. Better still, this knife is further enhanced with our revolutionary Arc-Lock for fast-access and full “lockup.” The X-Ray Vision keeps a low profile with its bead blasted blade finish and black GRN handle, keeping it lightweight and comfortable to hold and carry. A reversible clip allows both righties and lefties to carry the X-Ray Vision conveniently in pocket and pack or on vest, belt or jacket.

Part #: SV68
 Open: 8.37"
 Blade: 3.75" x .125"
 Weight: 5.7 oz.
 Steel: VG-10 Stainless
 Rc. 59-60
 Finish: Satin Polish
 Edge: Partially Serrated
 Handle: Titanium w/Stainless Liners
 Comes With: Reversible Bayonet
 Pocket Clip

Vision

Rotating out of a space-age titanium handle is the radical blade of the award-winning Vision. The geometric grind lines focus power on the edge and tip of the polished VG-10 blade. Completely corrosion proof, the titanium handle is lightweight like aluminum, but as strong as steel. Other features include SOG’s Arc-Lock, dual thumb studs, and our trademark reversible bayonet clip.

Part #: FC01-N
 Open: 10.125"
 Blade: 4.5" x .160"
 Weight: 8.5 oz.
 Steel: VG-10 Stainless
 Rc. 59-60
 Finish: Satin Polish w/
 Black TiNi Bevel
 Straight
 Edge: Titanium Bolster
 Handle: and Liner with
 Kraton Handle
 Comes With: Nylon Carry Pouch

Fatcat

The Fatcat is like our Tomcat after exposure to high levels of radiation. Our largest and most massive folder that we have ever produced, the Fatcat is not intended for the main stream. It is designed to be exceptional with never before seen details such as a dual-tone TiNi coated blade. Anyone who picks up this knife is amazed at the lightness and quickness, which is attributed to the solid machined Titanium handle. Once started, the gigantic VG-10 blade effortlessly spins open and locks up with one of the world's greatest locks- the Arc-Lock.

 Finish: Satin Polish
 Edge: Straight
 Handle: Kraton Handle w/
 Stainless Bolsters
 Comes With: Nylon Carry Pouch

Tomcat 3.0

Using our existing Tomcat handle, which is the third generation of the first SOG folding production knife, the LTD uses a technology that has previously been found only in custom knives. The VG-10 blade is painstakingly laminated with carbon fiber, the same material that aerospace had developed for the Stealth Bomber, to make a composite construction. The one sided tanto grind (Kataba) is visually unique and super sharp.

Stingray 2.0

This is an evolution of the original Stingray, which helped bring in a new age of modern pocketknives and was retired after more than 15 years of service. The Stingray 2.0 is the next era! It is a stout little rascal that reflects the thick blade stock of the original but enhanced with our unique san mai steel. These beautiful pocket sculptures feature inlays, polished stainless steel handles, patented Arc-Lock, and stunning mother of pearl thumb studs. Despite it's sleek and smooth exterior, the Stingray is still SOG tough on the inside, guaranteeing you will have the answer to many of life's situations at your fingertips.

 Finish: Polished
 Edge: Straight
 Handle: Jigged Bone or Carbon Fiber w/Polished Titanium Bolsters and Liners
 Comes With: Jewelry Bag

Arcitech

Combining technical excellence with a spirited design, the Arcitech has that trait that is so elusive... harmony. The mirror polished san mai blade (VG-10 core laminated with 420J2 stainless steel) moves smooth as silk thanks to our very special Arc-Lock and Abalone jeweled thumb stud. The titanium bolsters and liners meet old school jigged bone handles in a rare and beautiful combination. The color of the jigged bone handles vary in color from a deep maroon to flame yellow and black.

Models
 A01-P Jigged Bone
 A03-P Damascus w/Carbon Fiber handles

To create a truly unique experience, and a first for SOG, we started with one of our finest knives, the Arcitech, and added carbon fiber handles. Then we procured a stunning Japanese Damascus that uses a core of VG-10 and 15 layers of Nickel and stainless steel on either side. The steel is forged and folded again and again to produce this striking pattern. Finally the knife is acid etched to enhance the contrast and accentuate in the pattern.

Part #: CT-01
 Open: 6.75"
 Blade: 3" x .120"
 Weight: 3.6 oz.
 Steel: san mai VG-10 Core
 Rc. 59-60
 Edge: Straight

 Carbon Fiber Handle
 Comes with: Reversible Pocket Clip

Facet

The Facet combines high class with high tech. It features a textured carbon fiber handle and exquisitely machined nickel silver bolsters. Turned back and forth in the light, it dazzles the eye. In the hand, it dazzles the mind with balance and grace. The VG-10 blade, Arc-Lock system measured at over 1000-pounds of force and hardened stainless steel liners add strength without compromise.

 6061-T6 Aluminum
 Comes with: Reversible Pocket Clip

Bluto

The muscular stance and bulging form bely a quiet confidence. This little guy has its own point of view and the strength to back it up. With a very innovative textured machined aluminum handle, the Bluto handles well. Its VG-10 blade, Arc-Lock, and hardened scalloped steel liners make a rock solid package. The sweeping blade style is modern and functional and unique to the SOG line. Flex a new look with the Bluto.

Pendulum

There is a rhythm and cadence to the movement. An Action and Reaction. The Pendulum is not only interesting, it's functional. As you open the blade the bolster rotates out and then returns. To release our famous Arc-Lock system, simply slide the bolster and unlock the blade. This modern folder has a distinctive look; with 360° notched liners that provide extra grip, reversible pocket clip, modified spear point blade and textured handles. It is one of those rare products that says by mere possession, you won't settle for the ordinary.

Toothlock

The Toothlock is a new design expression. It combines our high performance piston lock but with the addition of a kick start device. Pull back the lock and the blade is nudged out of the handle to start its journey. Why the name the Toothlock? Check out the shape of the lock bar with its two lobe geometry. This new technology merges with an assertive handle pattern that changes direction to match the tactile points on the hand. You will find it stimulating. The blade shape is novel as well with a wavy reverse curve that cuts effortlessly while maintaining a thick reinforced tip for power penetration. The san mai blade is ground to perfection and is reminiscent of ancient samurai designs.

Woodline Folder

That feeling of leaving civilization behind as you move out of the valley and into the wood line is the inspiration for this series of fixed blades and folders. These big upswept blades meet the challenges of extreme camping, hunting and survival chores. The blade is anchored in a handle comprised of stainless steel bolsters and beautiful hard wood. The handle configuration insures a solid grip regardless of what nature throws at you. The thumb grooves on the spine allow the application of downward pressure as well as giving greater dexterity. SOG Woodline... a confidence builder when out in the country where man is the minority.

See Woodline Fixed blade on page 40.

Salute

The Salute is an acknowledgment that great design can still be affordable with a little perseverance. Take the machined G10 handles in combination with scalloped full-length steel liners for a whole new look. Add a big lockback, smooth as silk operation, and a proven Bowie style blade. For good measure, throw in our new invention - a movable thumb stud so you can tailor the position to your own hands. We didn't forget to incorporate our trademark low carry bayonet clip either. The Salute lives up to its name and is worthy of carry on any front in the world... including your back yard.

SOGzilla

In devising this line, which includes several sizes and blade shapes we wanted to make the SOGzilla distinctive. SOGzilla is fast, you wouldn't want to try and outrun him! The grip is a dual directional prehistoric armor plate and the big bodied blade features a new opening shape... the likes of which has never been seen before. In hand, the knife points instinctually and feels familiar. Steel liners make a stout construction. Keep your knife caged in your pocket with our patented low carry reversible clip. SOGzilla... It's a new species. Don't be caught alone!

 Wire Strippers

Kilowatt

Get 'charged up' with the Kilowatt, the first working theme knife designed for the electrician, homeowner, contractor, or anyone who might need to strip wire in a pinch. Three separate systems address wire from fine multi strand all the way up to cable. There is a stripper bar for wire sizes of 10-22, an adjustable spring-loaded UTP/wire stripper in the back, and just in case... our patent pending hole stripper that uses the main blade. Schematic grips, insulator thumb stud, and a blade with receptacle engraving are signatures that make this a very unique liner lock knife.

Contractor 2x4

The Contractor 2x4 breaks ground with a whole different framework! One of the new breed of thematic knives originated by SOG, this knife is no apprentice. Open or close the blade and see the circular saw turn or rotate the saw and open the blade. Whether you are a contractor, know a contractor, or wished that you didn't... the 2x4 will help on the job... whatever that might be. How many times have you wished to sharpen a pencil without having to walk back in the house? Or try and get that picture level without a level? Want to strip a wire real quick? No worries. Use the patent pending strippers in the handle. Oh yeah, if you ever need that one last lucky nail, we have that too! What to do to drive that nail home... we can't help you there, at least not yet.

AutoClip Series

You asked and we listened. We have brought back our AutoClip series, a no nonsense line of lockbacks that are lightweight, durable and affordable. The name comes from our spring-activated clip design, which allows variable thickness pockets or lapels to be treated equally with the proper clamping force. The next thing you might notice is our adjustable thumbstud (patent-pending) fine tune its position and tailor it to your hand. Appreciate the AutoClip's signature basket weave texture, which insures non-slip performance. The blades are beautifully ground with a two-directional satin finish, typically only found in much more expensive knives. Several sizes and styles are available to fit your many applications. Carry more than one.

Contractor Series

A craftsman is only as good as his tools. For almost 25 years, SOG has been a leading supplier of knives and tools to the industrial, contractor, and DIY markets. The reason is simply that our products are some of the toughest and we stand behind them with lifetime guarantees. The Contractor series is designed specifically for tradesmen, including electricians, handymen, and for those who take pride in a job well done. Modernizing traditional patterns, these four knives feature: multi bladed lockback, patent pending holes/notches for stripping wire, aggressive G10 or aluminum grips, as well as razor sharp blades.

Nautical

The Nautical is not just a knife it's a precision instrument with many parts working together in synchronicity. A marlin-spike is especially useful in marine applications to untie knots but we were surprised to find out how many other uses they have. Use it as an awl, a scribe, for digging, prying, scraping, or ... you get the idea. What you might not see at first glance though is that the liners are crafted from super strong and lightweight titanium and mated to tough G10 handles. The big half serrated blade opens and closes as fast as you can say 'red on right return' (a nautical term).

M40T-N

SEAL Team

The SEAL Team knife is the knife that started an era. It won the knife competition put on by the Naval Special Warfare Center by outperforming all of the competition. It has spawned many new SOG models as well as many 'wanna bes' by others. The evaluation program included: tip breaking stress, blade breaking limit, sharpness, edge retention, handle twist off force, two week salt water immersion tests, gasoline and acetylene torch resistance, chopping, hammering, prying, penetration tests, cutting six different types of rope and line, plus an intense hands-on competition in the field.

This distinctive fixed blade is the go to choice for a mid to large size tactical fixed blade.

Tigershark

In the presence of the revised Tigershark series, one's pulse quickens. It is instantly recognized for its signature handguard and defensive rear point, which are removable for a more streamlined look. But it is also familiar as the largest member of the SEAL series with precise grind lines, scalloped back edge, touch point checkering, and superior ergonomics. The Tigershark is capable of chopping and slicing with an economy of scale and ferocity not available to smaller knives. Still, it's impeccable balance and style create fluidity in the hand that is unexpected and thrilling.

Models

TE01-N Powder Coated (shown)
 TE02-N Black TiNi

Force

The first thing that is obvious about the Force is how stout it is. The thick blade and minimal grind profiles maximize the strength of the blade. This is a beast of a knife and will be virtually unbreakable. The full tang runs out the back of the glass-reinforced handle and into a glass breaking point. The handle is perfectly contoured and covered in aggressive checkering that is not for the faint handed. The Force is recommended for extreme, long duration operations.

Part #: SE38-N
 Length: 11.25"
 Blade: 6" x .236"
 Weight: 10.5 oz.
 Finish: Black TiNi
 Steel: AUS-8 Stainless

NW Ranger

Sportsmen, fishermen, hunters, and outdoor enthusiasts require a knife that can fulfill a variety of tasks, is easy to carry, and can perform in a wide range of environments. With an elongated clip point blade, flat ground bevels, and compact size, the Northwest Ranger is more than up to the task. This might be one of the most versatile fixed blades that we make and you will find that it packs a lot of capability in a lightweight package.

Tsunami

With the reintroduction of this popular SOG knife, we have taken what made the Tsunami so great and improved it. Some of the changes are subtle- like refining the overall balance. Some are more obvious, like the grooves in our crossguards and the option of a tough TiNi coating. Finally, the beautiful Tsunami blade shape is mated perfectly with an extremely tactile diamond checkered Kraton handle. Experience this next generation of a great classic!

SOG Bowie 2.0

Our modern replica of the original Studies and Observation Group knife secretly developed and used in the Vietnam War by the 5th Special Forces and other elite soldiers. These individuals were specialists in reconnaissance, infiltration, and behind the lines operations. The SOG Bowie 2.0 has become a classic that is unparalleled in quality. The sculpted crossguard, deep hollow grinds and precision detailing, such as the all TiNi coating, and faceted tip are unmistakable signatures.

SOG custom cylinder nut on the Bowie 2.0, Super SOG Bowie, Agency, Tech Bowie and Trident 2.0.

Part #: SBIT-L
 Length: 12.875"
 Blade: 7.5" x .250"
 Weight: 17.4 oz.
 Steel: AUS-8 Stainless
 Rc. 57-58
 Finish: Black TiNi
 Edge: Straight
 Handle: Epoxied Leather
 Washers with
 Stainless Crossguard
 and Pommel
 Comes With: Leather Sheath with
 Sharpening Stone

Super SOG Bowie

How appropriate that for our 20th anniversary we launched a new adaptation of the original SOG Bowie that founded the company. This large format 7-1/2" blade will stun you with its exacting construction and precise grind lines. Unlike the originals, all parts are protected with our Black TiNi Hardcased coating that is the very best for appearance and performance. The stacked leather washer handle is completely traditional. SOG today is 20 plus years smarter and our products show it.

Part #: S2B-L
 Length: 11"
 Blade: 6.4" x .240"
 Weight: 11.2 oz.
 Steel: AUS-8 Stainless
 Rc. 57-58
 Finish: Satin Polish
 Edge: Straight
 Handle: Micarta Washers with
 Stainless Crossguard
 and Pommel
 Comes With: Leather Sheath with
 Sharpening Stone

Trident 2.0

For those who are looking for the style of the SOG Bowie in a stainless steel design, look no further than the Trident. Our Trident embodies the spirit of our most capable special forces unit, the Navy SEALs.

The Trident 2.0 has morphed into a top-notch work knife with the use of technology, modern materials, and a little class thrown in for good measure. For starters, all the metal parts and including the blade, crossguard and pommel are satin finished stainless steel. The stacked Micarta washer handle nods to tradition with the use of interspaced white washers and provides an unmistakable SOG look. The thick (.240") AUS 8 blade is topped off with a faceted tip that is a SOG signature and completes the total package.

Length: 12.675"
 Blade: 7.5" x .150"
 Weight: 9.6 oz.
 Steel: AUS-8 Stainless
 Rc. 57-58
 Finish: Black TiNi or
 Satin Polish
 Edge: Straight
 Handle: Epoxied Leather
 Washers with
 Stainless Crossguard
 and Pommel
 Comes With: Leather Sheath with
 Sharpening Stone

Agency

The Agency follows a SOG tradition of recreating and modernizing historic classics. This unique knife was shrouded in secrecy and originally created for special CIA operatives in the early days of the Vietnam War. It was designed for clandestine and counter insurgency teams who lived in the jungle for months at a time and saw vicious close quarter combat. We vastly improved the construction and quality with modern materials like TiNi coatings and epoxy filled leather washers that were unknown at that time. An exquisite design of the highest caliber, the SOG Agency captures the mystique of a positively unique fixed blade.

 Finish: Black TiNi or
 Satin Polish
 Edge: Straight
 Handle: Kraton Rubber with
 Stainless Crossguard
 and Pommel
 Comes With: Kydex Sheath

Tech Bowie

Based on the classic SOG Bowie that founded our company, but morphed into a top-notch work knife with the use of technology, modern materials, and a little class thrown in for good measure.

For starters all the metal parts are satin finished stainless steel and available with gloss black TiNi coating. It looks incredible! Offset against this, the tactile Kraton rubber handle nods to tradition with the use of interspaced white washers providing an unmistakable SOG look. The thick (.240") AUS-8 blade is topped off with a faceted tip that is a SOG signature and completes the total package.

 Handle: Kraton Rubber with
 Stainless Crossguard
 and Pommel
 Comes With: Leather Sheath

Creed

One of the more dramatic blade shapes in the SOG arsenal, Creed delivers on its promises of high-level performance. The very stout front end weights the knife forward for chopping and piercing. The big belly on the blade maximizes the cutting edge for extreme wilderness and hunting situations. Mated with the Tech Bowie handle to provide a confident grip in inclement weather. This is a great example of a collectable and working knife coming together.

Models

 Steel: AUS-8 Stainless
 Rc. 57-58
 Finish: Black TiNi
 Edge: Straight
 Handle: Kraton Rubber with
 Stainless Crossguard
 and Pommel
 Comes With: Leather Sheath

Recon Bowie 2.0

The original Recon was the first knife developed and procured by SOG personnel in the Vietnam War. It was designed for SOG's clandestine cross-border Recon team which experienced vicious, close-quarter combat. We have taken this highly collectable classic design and updated with it with modern materials like stainless steel, rubber handles and black TiNi coating. The Recon Bowie 2.0 captures the essence of this positively unique blade.

Part #: SSD01-L
 Length: 11.8"
 Blade: 7.2" x .23"
 Weight: 12.3 oz.
 Steel: AUS-8 Stainless
 Rc. 57-58
 Finish: Satin Polish
 Edge: Straight/Serrated
 Handle: Kraton Rubber with
 Stainless Crossguard
 and Pommel
 Comes With: Leather Sheath

Demo

The SCUBA/DEMO is the rarest of the Special Forces SOG knives. In fact, only one original is known to exist today. Originally 39 were made and 38 were delivered to the Naval Advisory Detachment for missions along the North Vietnamese coastline. Of the 38 issued, 36 were lost in operations and the other two were never seen again. Using current manufacturing techniques we are now able to create a spectacular reproduction of this ultra rare knife but modernized as well.

Part #: FG01-L
 Length: 10.875"
 Blade: 6" x .16"
 Weight: 10.1 oz.
 Steel: san mai VG-10 Core
 Edge: Straight
 Handle: GRN
 Finish: Black/Satin Polish
 Comes With: Leather Sheath

Forge

The SOG Forge evokes a period in Japanese history when honor was the most highly coveted virtue; It was a time when everything was handmade with meticulous care. A good knife or sword was meant to last for life- and as such, The Forge is built using both traditional and modern methods. It projects a sense of elegance and sophistication at the same time. The VG-10 san mai blade is hammer forged creating the distinctive pattern and the handle is precisely fitted using a stepped topographic design for exemplary balance and feel. And because no detail is overlooked, the sheath is as good as the knife- crafted in Japan from thick rich leather, with a splash design of beautiful silk stitched into it's face to make each one of a kind.

Length: 10.43"
 Blade: 5.3" x .173"
 Weight: 8.4 oz.
 Steel: VG-10 Stainless
 Rc. 59-60
 Finish: Satin Polish or
 Black TiNi
 Edge: Straight
 Handle: GRN
 Comes With: Leather Sheath

Vulcan Fixed Blade

Radical blade grinds have been one of the signatures of SOG's knives, but to produce these complex blade shapes and grinds requires the finest attention to detail. Perhaps this helps to explain why the Vulcan fixed blade is so special. Each side of the knife has three separate grinds that come together to make a strong powerful knife. The reverse curve in the VG-10 blade is further evidence of this masterful craftsmanship. The full tang blade is clad with glass-reinforced GRN scales that are textured in an intricate wave pattern. The premiere tactical knife for the modern militia.

Comes With: Leather Sheath and Presentation Box

Kiku

When SOG inspiration meets master craftsmanship, true works of art are born. Introducing the SOG Kikus, collaborations with custom knife maker Kikuo Matsuda. Kiku is considered to be the finest hand grinder in the world. Over his lifetime he has developed techniques that are simply unparalleled. He is able to combine flat, hollow, and convex (Hamaguri) grinds that all interact seamlessly. He does it by altering his finger pressure and listening to the sound of the grinder without actually seeing the blade. His works are in the some of the finest collections in the world. This collection features mirror polished blades with double bevel grinds, green canvas micarta handles, and OU-31 steel. OU-31 is a micro fine steel that features high hardness Rc. 64 and is 3 times tougher than D2. Only a few serialized pieces will be created as the master Kiku must grind each himself. All will come with a custom leather sheath, presentation box, and certificate of authenticity.

KU-01 - Bowie knife with dual bevels and signature acid etched texture

KU-02 - Tanto with dual bevels and signature acid etched texture

KU-03 - Dagger with 4 double grinds, convex edges (Hamaguri) and blackened traditional samurai guard (Katana Tsuba)

Reverse Collaboration is where a manufacturer works closely with a custom maker to produce a limited number of knives in the style of the manufacturer. This will provide a set of guaranteed orders for the custom maker while also elevating his stature in the cutlery world. The manufacturer also gains stature by working with the custom maker and can sell knives to markets and buyers that would not normally buy that makers products.

Aura Fixed Line

With our Aura line, we built on the traditional ideas of the past and evolved them for the future. We thought about weight, ease of carry, safety and intuitiveness. We studied the original bowie knife created by Rezin Bowie in 1938. We considered utility, ergonomics and comfort. The result... the Aura fixed blade. We used a high impact and tough GRN handle that is overmolded with a more pliable material for non-slip comfort. We didn't want a big clunky crossguard that isolated the hand so we adapted the blade design to provide the element of safety and allows greater control. And just in case your extremely sharp and durable edge requires a touch up in the field. Unscrew the carbide sharpener in the back of the handle and reflect that yes, maybe this is a new day in knives. Check out the Aura in multiple fixed and folding blade configurations. Pedigree for the future.

Field Pup

"It's just about the perfect size, weight, feel and balance," is the comment we hear from wilderness guides who handle the Field Pup for the first time. It's comfortable to use with its Kraton molded handle that form fits the full tang blade. SOG's trademarked finger grips are combined with aggressive thumb notches on the back of the blade, making the Field Pup a real working knife. The blade is also protected by SOG's nylon sheath.

The Field Pup II capitalizes on the success as well as the features of the Field Pup I. This is a significantly larger knife that has great presence and power. Beautifully hollow ground, choose between satin and black TiNi finishes.

Woodline

That feeling of leaving civilization behind as you move out of the valley and into the wood line is the inspiration for this series of fixed blades and folders. These big upswept blades meet the challenges of extreme camping, hunting and survival chores. The blade is anchored in a handle comprised of stainless steel bolsters and beautiful hard wood. The handle configuration insures a solid grip regardless of what nature throws at you. The thumb grooves on the spine allow the application of downward pressure as well as give greater dexterity.

Fixation

Among other things, SOG has a reputation for producing some of the finest production fixed blades in the world. Now we have developed along with military consultants an even more economical choice with the Fixation series. Seamless fits between blade and cross guard, wrap-around checkered handles, blade grooves, thumb notches, spanner nuts, and crossguard cutouts all say this knife is as distinctive as you are. Great balance and proportion make these knives very agile. Let our Fixation become yours!

Daggert I & II

The challenge was to create a new breed of extreme fixed blades... suitable for today's modern military, capable night and day, wet or dry, and able to be carried in a variety of ways. But you might ask, what could possibly be new in a fixed blade? The Daggerts easily answer this question with contemporary solutions and have been tuned and tweaked for performance at every level. Who would have thought how far a fixed blade could come! The Daggerts are a well thought out complete package. The only thing left for you to decide is which size.

Jungle Series

For the primitive in all of us. When the only thing that separates you from them is your equipment, it better be good. The Jungle series is durable and comfortable with a molded Kraton handle that features our trademark Digi-Grip handle texture, a way to guarantee gripping power where you need it.

Now with three distinctive blade shapes there is one for every taste. The Primitive is hard to categorize between a big knife, a small machete, or a survival tool as its talents lie in chopping, slicing, sawing, pounding, etc. The Canopy and Warrior feature thicker blades and new blade grinds. All three include a Nylon sheath with utility pouch.

Don't be caught alone!

 Handle: Kraton
 Finish: Black Powder Coated
 Comes With: Nylon Sheath

SOGfari Machete

Our machetes are exciting additions to the SOG family. Its not 'should I have a machete' but 'which size will work for me.' Machetes are one of the more useful edged tools in the world. They have cleared brush, blazed trails, chopped wood, built shelters, harvested crops, prepared meals, hunted and protected for generations. Careful attention has been given to the SOGfari to make sure that the weight was right and the handles were comfortable for extended use. Whip them through the air and hear them sing. We've added a real working saw on the back of the blades with teeth that cut deep. Extended out of the back of the handle is a spiked tang for pounding and scraping. There are even holes in the handle to mount lanyards.

SOGfari... the go-to tool for survival, exploration and adventure.

Swedge

We share something with Brent Beshara, the belief that excellence in design is fundamental. Born out of our collaboration is this unique set of tactical blade shapes. As a Canadian special ops military instructor for 24 years, a life-long martial artist and a custom knife maker, Brent Beshara has created a new blade geometry that makes the tips of the knives much stronger and less prone to breaking. The Swedge's functional shapes are fast and powerful with grind lines never used before. All feature a full-tang, G10 handles for non-slip grip and a heavy duty Kydex sheath that offers a variety of mounting options.

Head Length:	8.25"
Edge Length:	2.75"
Weight:	24 oz.
Steel:	420 Stainless
Finish:	Black Oxide
Edge:	Straight
Handle:	Ballistic Polymer
Comes With:	Nylon Sheath

Tactical Tomahawk

Based on the Vietnam Tomahawk, the Tactical Tomahawk is an extreme evolution of the original which was considered one of the more unusual weapons of its day. Today there is a real need for a versatile tool for breaching operations, excavation, obstacle removal, extraction, and other utility applications.

FastHawk

The SOG FastHawk is faster, lighter, more agile, and easier to carry than its sibling the Tactical Tomahawk. This is not to say it is not still powerful, versatile, and functional. It is a tool that will be used for much more than you might anticipate. Chopping, breaking, cutting, hammering, piercing, digging, prying, pounding, shaving, notching, opening and throwing are all capabilities well within the FastHawk's reach.

Part #:	F06T-N

Edge: Straight
Handle: Ballistic Polymer
Comes With: Nylon Sheath

Double Headed Axe

The SOG Double Headed Axe lets you get medieval when you work. Based on the construction and durability of the world renowned Tomahawk, but with a heavier two-edged head, this formidable axe can shape, split and cut wood, harvest timber, as well as be used in military/LE operations for breaching, extraction, etc. It is big enough to exert significant power with a two-handed grip but light enough to use with a single hand.

Part #:	F09-N
Length:	11.1"
Blade:	2.4" x .186"
Weight:	18.6 oz.
Steel:	420 Stainless
	Rc. 51-53
Finish:	Black Oxide
Edge:	Straight
Handle:	G10
Comes With:	Nylon Sheath

Hand Axe

A simple and genuine utilitarian design, the SOG Hand Axe will perform as a wilderness back pack essential as well as a camp, truck and preparedness tool. We opted to include G10 scales on the handles... for a more aggressive grip. With enough weight to make short order of camp chores, it also will not punish you when carrying on extended adventure trip.

Battle Axe

Our modern battle/throwing axe evokes its origins from medieval times. Whether used as a target axe, SWAT tool, universal back up, or hung above the fireplace; it is very effective. The pike in the back is upswept for better target penetration. Size and heft are balanced for optimum swing control. The handle is sculpted from heavy duty black G10 and the entire solid blade is protected with SOG's Hardcased black coating. Nylon sheath included.

Part #:	F02T-N
Overall Length:	12.25"
Head Length:	7"
Edge Length:	3.75"
Weight:	20.2 oz.
Steel:	420 Stainless
Finish:	Black Oxide
Edge:	Straight
Handle:	G10
Comes With:	Nylon Sheath

Part #: F04T-N
Length: 10"
Blade: 4.375" x .135"
Weight: 5.3 oz. each
Steel: 420 Stainless
Finish: Black Oxide
Edge: Straight
Handle: N/A
Comes With: Nylon Sheath

Throwing/Utility Knives

These stylized knives are not only fun to sail through the air, they are practical as well. Completely protected by SOG's Hardcased black coating, they are extremely scratch resistant. Their balance, aerodynamics, and proportions make them great throwing knives. For the same reasons they also make great back-up field knives. Wrap the handles with paracord or use as is and you have three knives for the price of one! Includes nylon sheath that safely carries all three.

Part #: FS01-N
Length: 10.65"
Blade: 4.25"
Weight: 10.0 oz.
Steel: 420 Stainless
Finish: Black Oxide
Edge: Double Edge Straight
Handle: Nylon
Comes With: Nylon Sheath

Spirit

The Spirit looks like a futuristic tribal spear taking off from "Area 51". Sleek and aerodynamic, it hides a secret... Unscrew the handle and use a broom handle* to complete the spear! In a survival situation, use a branch to make the spear shaft and tighten it with a nail or the provided setscrew. With the provided handle the Spirit can be thrown or used as a cutting tool.

Do you have the Spirit?

** The Spirit will fit on most common broom handles.*

Revolver

It isn't very often that a product can create a new category, but the Revolver does just that. We have pioneered a fixed blade with a new twist... actually a complete revolution. The Revolver's secret is simply twice the capability for the same size and weight. Utilizing patented technology developed by Robbie Roberson and Spencer Frazer, you can depress the locking lever and rotate the blade to transform the knife into a saw. It's so easy, so cool, that you'll wonder why it wasn't done a long time ago.

The Revolver comes standard with a new look in blade shape that is not only functional, but distinctive. A survival saw serves as a backup in the handle. The blade features a forward thumb rest for increased dexterity and downward pressure. A GRN handle hides the stainless steel liners which ensure strength and quality.

Why not pack twice the capability with the Revolver? It just might transform your idea of what a knife should be.

- Models**
- FX20-N Hunter
 - FX21-N SEAL

Part #: F10-N
Length: 14.75"
Blade: 8.25"
Weight: 5.9 oz.
Steel: High Carbon Steel
Finish: Black Oxide
Edge: Saw
Handle: Soft Grip TPR
Comes With: Nylon Sheath

Folding Saw

A saw is an essential piece of survival equipment. The longer the saw, the easier to use, but the harder to carry. We achieved a nice balance between the two. The Folding Saw has a 7.5" blade of hardened and tempered steel that makes short order of branches, small logs, and brush. A comfortable handle helps to cut deep and true on each and every pull stroke. The extremely sharp teeth are differentially tempered for long life and work on green as well as hard wood.

Part #: F08-N
Length: 18.25"
Blade: 7.25" Closed
Weight: 24.5 oz.
Steel: High Carbon Steel
Finish: Black Powder Coated
Edge: Straight
Handle: Steel
Comes With: Nylon Sheath

Entrenching Tool

A folding shovel can be an indispensable tool in today's constantly changing environment. We know one thing, when you need to move sand, dirt or snow you wish you had that shovel close at hand. Our all steel construction entrenching tool uses a tempered steel blade with teeth cut into it for cutting and slashing. The triangular handle is strong and fits the hand well. Folded, it takes up about the same space as a stack of paper plates. Which would you rather have?

Displays

Large Counter Display ACR-102

The Small Countertop Display accomodates eight folding knives, two fixed blades and three multi-tools.

Width: 19", Height: 21", Depth: 6.5".

Display includes:

- FSA-7 Flash I folding knife
- BBA-99 Blink folding knife

- S63 PowerLock multi-tool

Small Counter Display ACR-306

The Small Countertop Display accomodates three folding knives, one fixed blade and one multi-tool.

Width: 16.5", Height: 11", Depth: 4.5".

Display includes:

- TFSA-98 Flash II folding knife (Black TiNi finish)
- TF-3 Trident folding knife (Tigerstripe finish)
- E37T SEAL Pup Elite folding knife
- PE14 Pentagon Elite fixed blade
- B63 PowerLock multi-tool (Black Oxide finish)

Warranty

SOG Warranty Information:

All SOG knives, tools and gear are guaranteed against defects in workmanship and materials for the life of the original purchaser. Sharpeners are guaranteed for one-year from the time of purchase. This guarantee is voided (as determined by SOG) by misuse, abuse, improper maintenance, or alterations of the product and does not cover any normal wear or tear that might occur.

We are not responsible for lost or stolen packages that do not arrive to our facility.

SOG reserves the right to the repair or replacement of a product at our discretion. Products that are discontinued and not repairable will be returned as-is with a gift certificate of similar value, as determined by SOG, which can be used for a future purchase.

Examples of Non-Warranted items:

Rusted/spotted/stained blades or handles (coated or not), broken or bent knife tips, worn tool components, dull/chipped knife blades, scratched blade/tool coatings, worn/loose Kraton slabs, sheaths and pouches (if brand new sheaths are determined to be defective they are replaced separately from the knife/tool), and broken/lost thumb studs.

SOG Unconditional Pocket Clip Warranty:

Pocket clips can be broken if they are accidentally caught on foreign objects while wearing. To help prevent such occurrences, SOG recommends that you wear your knife in your front pocket, with the knife inside your pocket. If, for whatever reason, your clip bends or breaks and you would like to receive a replacement, email or visit http://sogknives.com/store/clip_request.html. Damage to a knife handle because a clip has snagged is not considered "normal," and any such damage will be assessed under warranty.

Sharpening:

SOG offers a sharpening service for our products at the minimal charge of \$9.00.

Broken Blades:

In the unlikely case that your knife blade breaks, we will do a hardness test on it to see if it is within specs and therefore eligible for replacement.

Costs:

SOG will pre-determine the cost of repair or replacement of non-warranted items and communicate the estimated cost to the customer before any work is performed.

When returning product for warranty/replacement please do the following:

Include a brief note inside your package stating what you are returning, the claimed defect and how it failed. Also, include inside the package, your name, address, and a daytime phone number or email address to reach you in case we have any questions.

Send all warranty claims to:

SOG Specialty Knives and Tools, LLC
Attn: Warranty Dept.
